PREMIUM AIR CONDITIONING SYSTEMS

State-of-the-art air conditioners for home and business

SONNIGER is a European provider of cutting-edge, energy-efficient and optimally selected heating and ventilation equipment.

We specialise in designing and supplying air conditioners, air heaters and air curtains.

SONNIGER offers premium-class air conditioners. Our products feature timeless designs with diverse range of functionalities, and ensure users' safety and wellness. Such factors as a clearly defined product range, full availability and dedicated customer support personnel ensure that the SONNIGER brand guarantees highest possible service levels.

premium-class air conditioning

- ✓ cutting-edge design
- ✓ advanced healthcare functions
- ✓ smart air flow
- ✓ energy-efficient cooling and heating
- ✓ mobile app control

Smart Airflow

SONNIGER air conditioners adjust their operating mode to actual users' needs. The Coandă effect ensures best possible air circulation. In the cooling mode, an air stream is directed to upper room sections, and then it flows downwards to uniformly cool down the entire room space. In the heating mode, warm air is directed towards the floor, and then gently flows upwards to ensure thermal comfort in a room.

Healthy Filter

SONNIGER air conditioners supply safe and healthy air. Our cutting-edge 4-in-1 filter combines silver ions, activated carbon, catechin filter and vitamin C to eliminate bacteria and refresh air in a room.

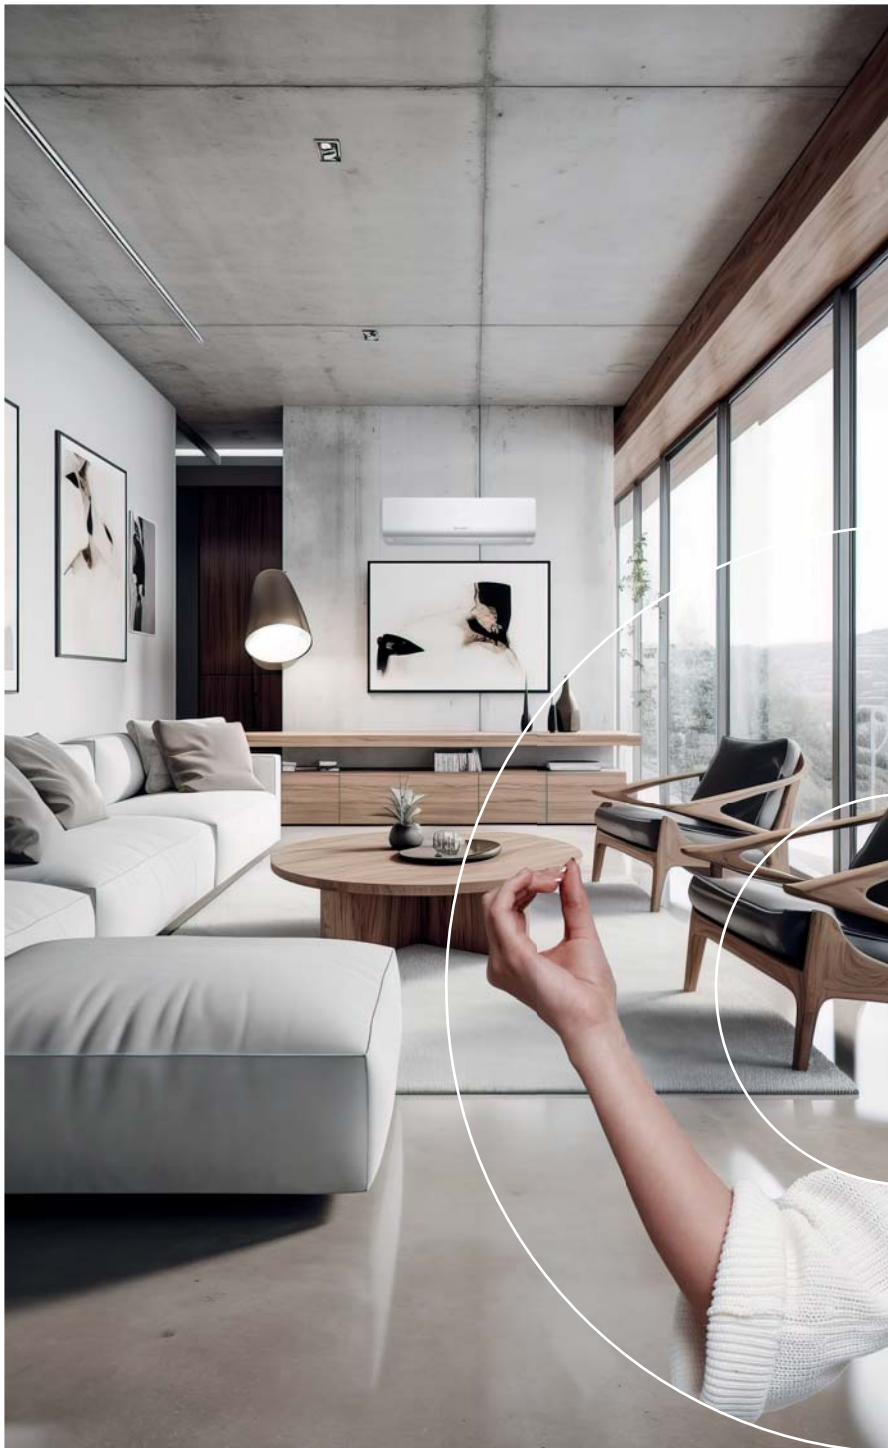

Golden Fin

The air conditioner exchanger features **the Golden Fin technology**. The indoor unit exchanger thin plates contain gold-plated components to ensure long-lasting protection against rust and damage, and to radically limit fungi and bacteria growth.

design & function

iFeel

This feature is operated by an additional temperature measurement via a temperature sensor built in a remote control device. Therefore, the air conditioning system is more "aware" of its surroundings to select optimum temperature and air supply intensity, thus maintaining effective and comfortable temperature levels.

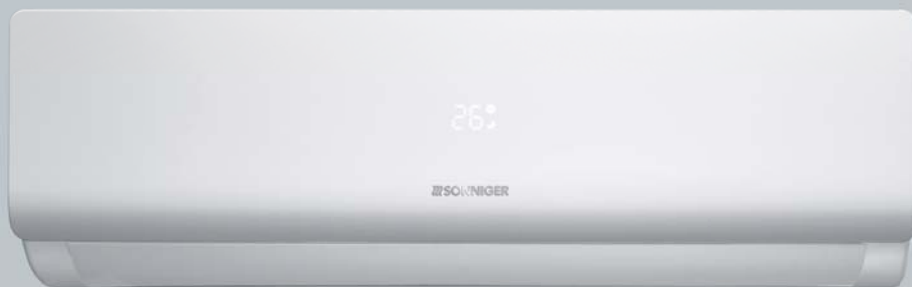

Control: app and remote control device

Control your SONNIGER equipment from any place in the world.

The **SmartLife app** enables you to control your air conditioning system with your phone, regardless of whether you are at work, on holiday or in transit.

multisplit air conditioners

Perfect solution for each home

The SONNIGER MX multisplit air conditioning system is an innovative solution facilitating simultaneous air conditioning operation in multiple rooms via a single outdoor unit. Visually appealing and discrete indoor units can be seamlessly arranged even in most intricately designed rooms.

The SONNIGER MX multisplit solution is characterised by energy-efficiency and minimised installation footprint.
